ICT60210 Advanced Diploma of Telecommunications Network Engineering

Release: 1
ICT60210 Advanced Diploma of Telecommunications Network Engineering

Modification History
Not Applicable

Description
Descriptor
This qualification reflects the role of an individual involving a high level of specialist technical skills and knowledge in telecommunications and IT networks using internet protocol (IP) systems who can:

- forecast network growth for enterprise network planning
- design and manage IP based network telecommunications equipment
- implement convergence technologies in enterprise telecommunications networks
- design and manage optical and wireless network telecommunications architectures for high speed broadband capability.

Job Roles
Job roles and titles vary across different sectors of the industry. Possible job titles relevant to this qualification include:

- telecommunications network manager
- network designer
- IP based convergence integrator
- IP based network designer
- network security manager.

Prerequisite requirements
There are no prerequisite requirements for individual units of competency.
Pathways Information

Qualification Pathways
Pathways into the qualification
Candidates may enter this qualification through a number of entry points demonstrating potential to undertake vocational education and training at advanced diploma level, including:

- after achieving the ICT50210 Diploma of Telecommunications Network Engineering or another relevant accredited Training Package qualification or relevant accredited course

or

- providing evidence of competency in the core units required for the ICT50210 Diploma of Telecommunications Network Engineering or equivalent units with vocational experience

or

- with substantial vocational experience but without a formal qualification.

Pathways from the qualification
After achieving the ICT60210 Advanced Diploma of Telecommunications Network Engineering, candidates may undertake the ICT70110 Vocational Graduate Certificate in Telecommunications Network Engineering or seek articulation into a University program.

Licensing/Regulatory Information

Licensing, legislative, regulatory or certification considerations
All training programs must be conducted with the reference to the regulatory regime of the prevailing statutory authority (currently ACMA).

Prerequisite units
There are no prerequisite requirements for individual units of competency.

Entry Requirements

Entry requirements
There are no entry requirements for this qualification.

Employability Skills Summary

Innovation and Business Skills Australia
### EMPLOYABILITY SKILLS QUALIFICATION SUMMARY

#### Communication
- determining options to rectify faults and discussing them with customer so that necessary action is determined
- documenting test methods and results
- making a complete check of installation against installation plans
- reading, interpreting and using equipment/system manuals and specifications and relevant enterprise policy and documentation
- conveying information to clients, colleagues and other site personnel
- providing feedback to customers on operating the equipment

#### Teamwork
- identifying members and roles of team
- identifying and contributing to team tasks and goals
- recognising and responding positively to conflict within team
- working with team members to work with clients and install equipment
- relating personal role to the industry
- participating in a team structure by identifying team members, tasks and goals and recognising and responding positively to conflict
- applying interpersonal skills with clients, employer, supervisors, work associates, team members and other contractors
- giving and receiving feedback to assist in meeting team and organisation goals

#### Problem solving
- ranking causes of problems, working from system-wide impacts to specific impacts
- diagnosing network security problems to secure the network
- identifying barriers to installation and developing strategies to overcome them within time and budget restrictions
- identifying faults or optimisation options
- rectifying faults and adjusting system to optimal operation
- determining cable routes taking into account building services, safety, industry codes and practices, and customer requirements
- following up promptly on difficulties and known problem areas

#### Initiative and enterprise
- prioritising urgent requests and acting according to organisational guidelines
- identifying barriers to installation and developing strategies to overcome them within time and budget restrictions
- adapting plan to suit specific features of site
- identifying issues and possible solutions within established guidelines
- interacting with enterprise personnel, customers and other contractors keeping a customer focus and considering customer
## EMPLOYABILITY SKILLS QUALIFICATION SUMMARY

<table>
<thead>
<tr>
<th>Needs</th>
<th></th>
</tr>
</thead>
</table>
| **Planning and organising** | - identifying realistic short and long-term career objectives  
- planning and provision to meet key dates and milestones  
- gathering data for the installation of systems and equipment  
- planning the installation of fibre cable, taking into account technical, scheduling and financial considerations  
- interpreting design and relating to site characteristics  
- prioritising work according to organisation guidelines  
- running a test of network security arrangements  |
| **Self-management** | - identifying realistic short and long-term career objectives  
- identifying work to be completed  
- complying with all related OHS requirements and work practices  
- developing installation plans to ensure minimal disruption to the workplace  
- checking that tools and equipment are in safe working order and adjusted to manufacturer specification  
- relating own role to the industry and establishing own work schedule  
- using strategies to present a professional image to customers  
- interpreting and applying relevant regulations and standards  |
| **Learning** | - relating current or intended role to career objectives in a positive manner  
- giving and receiving feedback to assist in meeting team and organisation goals  
- making clients aware of opportunities that exist for system upgrades, additional services and training  
- seeking assistance from team members when necessary  
- providing suitable training and assessment opportunities for work team members  
- providing training to customers on system, product, product features and facilities  |
| **Technology** | - checking that tools and equipment are in safe working order and adjusted to manufacturer specifications  
- converging many integrated and emerging technologies  
- testing and measuring of broadband network infrastructure  
- installing and operating telecommunications equipment and products  
- installing and operating equipment and products  
- identifying, replacing or repairing faulty parts and equipment  
- undertaking relevant acceptance tests and analysing results  |
EMPLOYABILITY SKILLS QUALIFICATION SUMMARY

| against specified performance criteria |

Packaging Rules

Packaging Rules

**Total number of units = 10**

4 core units, plus
6 elective units

Elective units must be relevant to the work outcome, local industry requirements and the qualification level. A minimum of 2 of these electives must be taken from Advanced Diploma level.

A maximum of two elective units may be substituted with two units of competency from any endorsed Training Package or accredited course at Advanced Diploma or Vocational Graduate Certificate level.

Units selected from other Training Packages or accredited courses must not duplicate units selected from or are available within the ICT10 Integrated Telecommunications Training Package.

**CORE UNITS**

ICTPMG6033A Develop a project management plan
ICTPMG6034A Prepare a detailed design brief
ICTSUS6233A Integrate sustainability in ICT planning and design projects
ICTTEN6206A Produce an ICT network architecture design

**ELECTIVE UNITS**

**ICT use**
(IP Networks)
ICAA5056B Prepare disaster recovery and contingency plans
ICAA5145B Identify best-fit topology for a wide area network
### Packaging Rules

<table>
<thead>
<tr>
<th>Code</th>
<th>Task Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>ICAA5241C</td>
<td>Design an enterprise wireless local area network</td>
</tr>
<tr>
<td>ICAB5237B</td>
<td>Build a high performance security perimeter</td>
</tr>
<tr>
<td>ICAB5238B</td>
<td>Build a highly secure firewall</td>
</tr>
<tr>
<td>ICAI5152B</td>
<td>Implement risk management processes</td>
</tr>
<tr>
<td>ICAI5196B</td>
<td>Implement secure encryption technologies</td>
</tr>
<tr>
<td>ICAI5197B</td>
<td>Install and maintain valid authentication processes</td>
</tr>
</tbody>
</table>

### Network planning

<table>

**Packaging Rules**

**Telecommunications engineering networks**
- ICTTEN6036A Undertake qualification testing of new or enhanced equipment and systems
- ICTTEN6042A Undertake system administration
- ICTTEN6043A Undertake network traffic management
- ICTTEN6044A Coordinate fault rectification and restoration of service following network outages
- ICTTEN6045A Implement planned network changes with minimal impact to the customer
- ICTTEN6047A Manage a common channel signalling network
- ICTTEN6091A Analyse and organise repair of highly complex telecommunications network faults
- ICTTEN6094A Verify new software and hardware releases
- ICTTEN6169A Produce and evaluate architecture designs for convergent cellular mobile networks
  *(Emerging Technologies)*
- ICTTEN6216A Design and manage internet protocol TV in a service provider network
  *(IP Networks)*
- ICTTEN6172A Install and configure an IP-MPLS network with virtual private network tunnelling

**Selecting electives for different outcomes**

The context of this qualification varies and this must guide the selection of elective units.

The following examples are designed to assist in the selection of appropriate electives for particular outcomes at this level but they are in no way prescriptive.

**Network manager**

Core units plus:
- ICTOPN6124A Manage optical Ethernet transmission
- ICTTEN6042A Undertake system administration
- ICTTEN6043A Undertake network traffic management
- ICTSUS6234A Establish a business case for sustainability and competitive advantage in ICT projects
- two additional units from elective units as appropriate to the specific job role.
## Packaging Rules

### Network designer
Core units plus:
- ICTOPN6128A Design a dense wavelength digital multiplexing system
- ICTRFN6171A Produce and evaluate architecture designs for WiMAX networks
- ICTTEN6169A Produce and evaluate architecture designs for convergent cellular mobile networks
- ICTTEN6216A Design and manage internet protocol TV in a service provider network
- ICTSUS6234A Establish a business case for sustainability and competitive advantage in ICT projects
- one additional unit from elective units as appropriate to the specific job role.

### Network planner
Core units plus:
- ICTNPL6029A Plan the development and growth of the telecommunications network
- ICTRFN6098A Monitor the capacity of and recommend changes to the cellular mobile network
- ICTTEN6045A Implement planned network changes with minimal impact to the customer
- ICTSUS6234A Establish a business case for sustainability and competitive advantage in ICT projects
- two additional units from elective units as appropriate to the specific job role.

### IP convergence integrator
Core units plus:
- ICTOPN6124A Manage optical ethernet transmission
- ICTTEN6169A Produce and evaluate architecture designs for convergent cellular mobile networks
- ICTTEN6172A Install and configure an IP-MPLS network with virtual private network tunnelling
- ICTTEN6216A Design and manage internet protocol TV in a service provider network
- ICTSUS6234A Establish a business case for sustainability and competitive advantage in ICT projects
- one additional unit from elective units as appropriate to the specific job role.

### Network security manager
### Packaging Rules

Core units plus:
- ICAA5056B Prepare disaster recovery and contingency plans
- ICAB5237B Build a high performance security perimeter
- ICAI5196B Implement secure encryption technologies
- ICAI5197B Install and maintain valid authentication processes
- ICAA6053B Design system security and controls
- one additional unit from elective units as appropriate to the specific job role.

### Wireless network designer

Core units plus:
- ICAA5241C Design an enterprise wireless local area network
- ICTRFN6171A Produce and evaluate architecture designs for WiMAX networks
- ICTTEN6169A Produce and evaluate architecture designs for convergent cellular mobile networks
- three additional units from elective units as appropriate to the specific job role.

### Optical networks designer

Core units plus:
- ICTOPN6128A Design a dense wavelength digital multiplexing system
- ICTOPN6129A Analyse optical transmission systems
- ICTTEN6036A Undertake qualification testing of new or enhanced equipment and systems
- three additional units from elective units as appropriate to the specific job role.
